	APPROVALOF STATE ENGINEER				
	This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following tations and conditions: This permit is issued subject to existing rights. It is understood that the				
righ plac reas two must inst accu mete comp regu publ	nt of water herein granted is only a temporary allowance and that the final water to obtained under this permit will be dependent upon the amount of water actually ed to beneficial use. It is also understood that this right must allow for a onable lowering of the static water level. This well shall be equipped with a (2) inch opening for measuring depth to water. If the well is flowing, a valve be installed and maintained to prevent waste. A totalizing meter must be alled and maintained in the discharge pipeline near the point of diversion and rate measurements must be kept of water place to beneficial use. The totalizing r must be installed before any use of water begins, or before the Proof of letion of Work is filed. This source is located within an area designated the State Engineer, pursuant to NRS 534.030. The State retains the right to late the use of the water herein granted at any and all times. This Permit does not extend the permittee the right of ingress and egress on ic, private or corporate lands. This permit is issued under the preferred use provisions of NRS Chapter 534.				
(CON	manner of use of water under this permit is by nature of its activity a temporary TINUED ON PAGE 2)				
The	amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to				
exce	edcubic feet per second				
Wor	k must be prosecuted with reasonable diligence and be completed on or before				
	f of completion of work shall be filed on or before				
	lication of water to beneficial use shall be made on or before				
	f of the application of water to beneficial use shall be filed on or before				
	in support of proof of beneficial use shall be filed on or before				
Com	oletion of work filed AUG 1 7 1992 IN TESTIMONY WHEREOF, I. PETER G. MORROS State Engineer of Nevada, have hereunto set my hand and the seal of my

(PERMIT TERMS CONTINUED)

use and any application to change the manner of use granted under this permit will be subject to additional determination and evaluation with respect to the permanent effects on existing rights and the resource within the ground water basin.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The issuance of this permit will allow the permittee to dewater the pit area. The water diverted from this well during the dewatering stage will be placed in such a manner as to allow for percolation back to the ground water source.

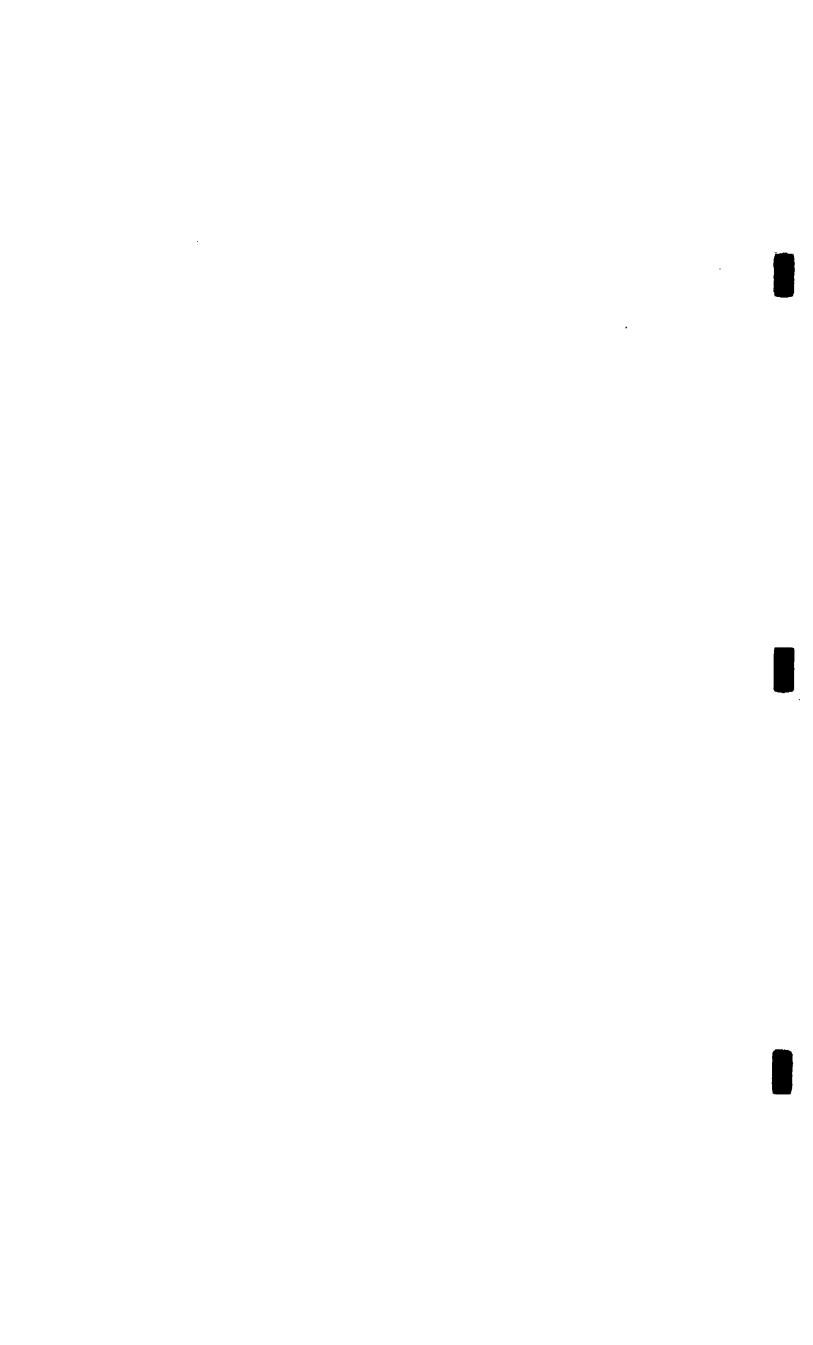

Monthly reports covering and including the rate of diversion and the total volume from this dewatering well shall be supplied to the State Engineer.

The permittee shall discharge water in a manner designed to conserve the resource. All disposal sites shall be first approved by the State Engineer.

After the dewatering of the pit area the water diverted will be used for mining, milling and domestic purposes.

The total diversion rate under Permits 50386, 50387, 50388, 50389, 50390, 50876, 50877, 50878, 50879, 50880, 50881, 50882, 50883, 50885, 50886, 50887, 50888, 50889, 51284, 51449, 51450, 51772, 51822, 51823, 51824, 51825, 51826, 52340, 53227, 53228, 53229, 53230, 53231, 53232, 53233, 53234, 53235, 53236, 53237 and 53238 shall not exceed 32.00 c.f.s. (14,360 gallons per minute).

This permit is issued with the understanding that the permittee will proceed with good faith and reasonable diligence to locate a suitable site for groundwater injection into the same acquifer that is the source of withdrawal under this permit.

12. This is a request to add 12, 40 acre permits to the existing permits: 50386 thru 50390, 50876 thru 50883, 50885 thru 50889, 51284, 51449, 51450, 51772, 51822 thru 51826 and 52340. All of these permits are within Sections 16 and 21, T.40N., R.35E., M.B.D.& M. The total diversion rate collectively shall not exceed 32.02 c.f.s. This water will be used for mining, milling, domestic and dewatering purposes at the existing operation. More than one well may be drilled in each 40 acre permit.
